Painting Vinyl Fence Instructions

Step 1 – Gather Materials

- Any Exterior Primer for Vinyl fence
- Valspar Gravity 4005-1B
- Brushes, rollers, gloves, etc.

Step 2 – Prepare Fence

Use a bucket of warm, soapy water to thoroughly wash your fence before rinsing it off with the garden hose. Take the time to dry off your fence with a clean towel as this will remove any residue that might affect paint adhesion. Let the fence dry before priming.

Step 3 – Apply Primer

Priming your fence properly will ensure that your paint does not crack or bubble prematurely. Use an exterior primer designed for vinyl products that is also mold and mildew resistant. Wearing latex gloves, use a brush to fill out tricky angles and a roller to cover the larger areas of your vinyl fence. Allow the primer to dry before painting.

Step 4 – Apply Paint

Paint your vinyl fence using the same method as priming. If you are using the same paint sprayer, make sure you clean it thoroughly and allow it to dry so primer and water are not mixed with your epoxy-based paint. Wrap brushes and rollers with plastic cling wrap instead of cleaning them between applying coats of paint. Let the paint dry between coats and before applying a sealant.
